Current Career Objectives

Through my current studies in web development, I have found a lifelong passion in software development. I believe I have now reached a level of knowledge that would allow me to excel in a full time professional setting, where I can absorb and learn from industry leading best practices and intermediate / advanced development methods. I hope to find an employer that will allow me to experience continued growth and learning from being immersed in an enterprise level application / project, with a conducive team environment with other experienced and skillful developers.

Work Experience

Ecolife Solutions

Jan 2022 – Oct 2022

Virtual Assistant / Data Entry

My current role at Ecolife Solutions has me handling the price listings and quotes, through both MYOB and Microsoft Excel. This requires a keen attention to detail, due to the strict requirement of data accuracy and consistency. Being a work from home role has also refined my own self-discipline and time management.

Coles Supermarket

Jan 2022 – Sep 2022

Nightfill Team Member

Independent Contractor

Sep 2017 – May 2021

Acoustic/Soundproofing Specialist

Responsible for the installation of Acoustic and Thermal insulation onto PVC Stormwater, PVC Condensate and Hot Water Copper pipe lines and stacks. Working in a construction environment refined my attention to detail and composure under pressure. Occasionally managed small teams of 2-5 people when the primary/lead worker on a building project. Notable projects as the primary worker include: The Johnson Apartments Spring Hill, Queensland State Velodrome and Queen Elizabeth II Jubilee Hospital Refurbishments.

Ecolife Solutions

Jan 2014 – Dec 2017
